New Horizon

No. 44-36

(Morocco Rose X Hall 40-24)

X Overture

\$30

THIS is definitely a new color in Iris. Not a pink blend, but a true peach pink self of beautiful form with a tangerine beard and pink buds. The standards, which are slightly deeper peach pink than the falls, are full, ruffled and tightly held. The haft is wide and free from markings. The falls are $2\frac{1}{8}$ inches wide, tailored and flaring. The flowers are above average in size, of exceptional substance, and carried on a strong well-branched stalk. 40 inches tall. Late.

The plant is winter hardy at Chicago; is vigorous, and an average increaser. H. C. 1945.

New Snow

No. 44-24

Snow Flurry X Fay 41-11

\$20

A WHITE Iris which is neither a warm nor a cold white but is as white as new snow. The beard is full and bright yellow, adding a great deal of life. This is the only color in the flower, as there are no haft markings.

A sturdy and well-branched stalk 40 inches tall holds the large, perfectly formed ruffled flowers well aloft. Mid season. The plants are completely winter hardy at Chicago. It is a fast increaser and has very dark green leaves and stems. H. C. 1945.

Fay Gardens

Desert Song

No. 44-47

Snow Flurry X Golden Eagle

\$15

THIS Iris was bred especially to fill a need in the light yellow or cream class.

The large, flaring and ruffled flowers are of nice proportions and bloom over a very long season. The flower is a cream self with pale green overlay giving a metallic sheen. The haft is clean and the beard is yellow.

The stalk is very strong, well branched and 40 inches tall. Mid-season. Very large plants and a fast increaser. Winter hardy.

Hemerocallis Fulva Rosea (Species)

\$4

THE most beautiful of any known species of Hemerocallis. The flowers are a clear rose pink and are borne on tall, graceful stalks $3\frac{1}{2}$ feet high. July-August.
